

BULK BOX REPAIR

Container Restoration

REPAIR PROGRAM

EDGE Manufacturing has developed an innovative and cost effective program to repair damaged seed boxes. This program will comprehensively prolong container life and service in the field for a fraction of the replacement cost. Our team of highly skilled plastic welders can resurrect virtually any container and quickly get it back into your system, saving you both time and money. Whether you need base, ring or lid repairs, our experienced team can get your containers fully operational fast!

WASH PROGRAM

Contamination and odors are major concerns for anyone in the food industry. Our 100% GREEN biodegradable cleaning process will insure that your repaired containers are safe and ready to re-use. Our proprietary blend of bacteriostatic cleansing solvent not only washes and cleans your container, but also prevents any new bacteria and fungus from redeveloping for a period of time. Environmentally safe cleaning products used on your repaired containers keeps your operation running green AND on budget. *Plastic recycling options also available for credit*

EDGE Manufacturing provides a 5 year limited warranty against defects in repair workmanship to the original contracted repair party. Original repairs are warranted to be free of defects in materials and workmanship. If the repaired portions of said container fails to conform to this limited warranty, EDGE Manufacturing Inc will, at its sole discretion and option, fix the defect at no additional cost to the buyer.
